

Vertilux Pledge of Quality

Our line of fabrics, including **Vertilux Vision** and **Ecovision** for roller, vertical and pleated shades are **Greenguard Certified** and **Greenguard Children & Schools Certified**. These certificates establish that our fabrics are formaldehyde free, and have low chemical and particle emissions, making them safe for use in schools, offices and other sensitive environments.

Our products also have acquired the **Oeko-tex Standard 100**. This certificate regulates every chemical in our fabrics and attest that they are not dangerous for the consumer's health or for the environment.

Vertilux Vision and **Ecovision** fabrics are manufactured exclusively by **Vertisol Internacional**, which is an **ISO-9001** certified company. This certification assures customers that the company has a good Quality Management System (QMS) in place. This permits our customers to feel comfortable with the use of our materials in all applications that may arise.

Vertisol Internacional warrants **Vertilux Vision** fabrics for a period of 5 years from their time of delivery. This means that all Vertilux Vision fabrics are guaranteed against any abnormal degradation under normal use including bleaching due to UV sunrays, and stable color as specified in the technical data for each product.
